DETROIT-BASED · MID-MARKET PHARMA

Pharmaceutical Supply Chain Consulting for Planning, Visibility & Execution

Gyan Solutions helps small and mid-sized pharmaceutical teams build clearer supply chain operations across planning, manufacturing, CDMO coordination, product launches, and commercial execution.

Pharma supply chain consulting for teams ready to move from reactive to controlled.

GYAN SOLUTIONS | HEALTH & LIFE SCIENCES

WHO WE ARE

Operations Consulting Built for Mid-Market Pharma

Gyan Solutions is an operations consulting and implementation firm that helps established and growing organizations identify what is breaking across workflows, data, reporting, and systems then improve the operation or implement the right technology solution.

Based in Detroit, we bring deep pharmaceutical operations expertise to small and mid-sized life sciences teams the kind of hands-on support that large firms rarely offer at this scale.

CORE SERVICE AREAS

8 Areas of Pharma Supply Chain Excellence

Each engagement is scoped to address critical supply chain challenges.

Strategic S&OP & SIOP

Integrated planning linking forecasts, capacity, and financial decisions.

Demand Planning

Forecast credibility across commercial and operations teams.

ERP & Digital Systems

SAP/ERP alignment, reporting visibility, and data handoffs.

Inventory & Working Capital

Inventory movement, policy design, and capital optimization.

CDMO Network Governance

Oversight, batch visibility, and performance accountability.

Manufacturing Execution

Production planning, schedule stability, and batch readiness.

Product Launch Readiness

End-to-end supply readiness for commercial launches.

Commercial Supply Chain

Product availability, distribution planning, and ERP reporting.

DEEP DIVE

Strategic S&OP & SIOP for Growth and Scale

The Problem

Without a clear S&OP rhythm, forecasts conflict, decisions come late, and supply teams stay reactive.

What We Do

We build SIOP & S&OP rhythms linking forecasts, supply plans, CDMO capacity, and financial decisions.

The Outcome

Fewer surprises, earlier decisions, and plans that operations and leadership actually trust.

CDMO & MANUFACTURING

CDMO Governance & Manufacturing Execution

CDMO Network Governance

We build onboarding and performance frameworks to improve supply predictability and reduce escalations across outsourced networks.

- Partner onboarding & performance management
- Batch visibility & escalation protocols
- Supply accountability across sites

Manufacturing Execution

We bring structure to production planning, schedule stability, and batch readiness — from floor to system.

- Production planning & schedule control
- Inventory movement & batch readiness
- Execution control & KPI tracking

OUR TEAM

Built From Practitioners Who've Done This Work

Our consultants bring senior supply chain experience from **GSK, Teva, Thermo Fisher Scientific,** and **Johnson & Johnson** across commercial supply, manufacturing, CDMO networks, and ERP transformations in FDA-regulated environments.

Regulatory Familiarity

GMP, FDA, Health Canada, MHRA, GLP, GCP, change control, and traceability.

Systems Readiness

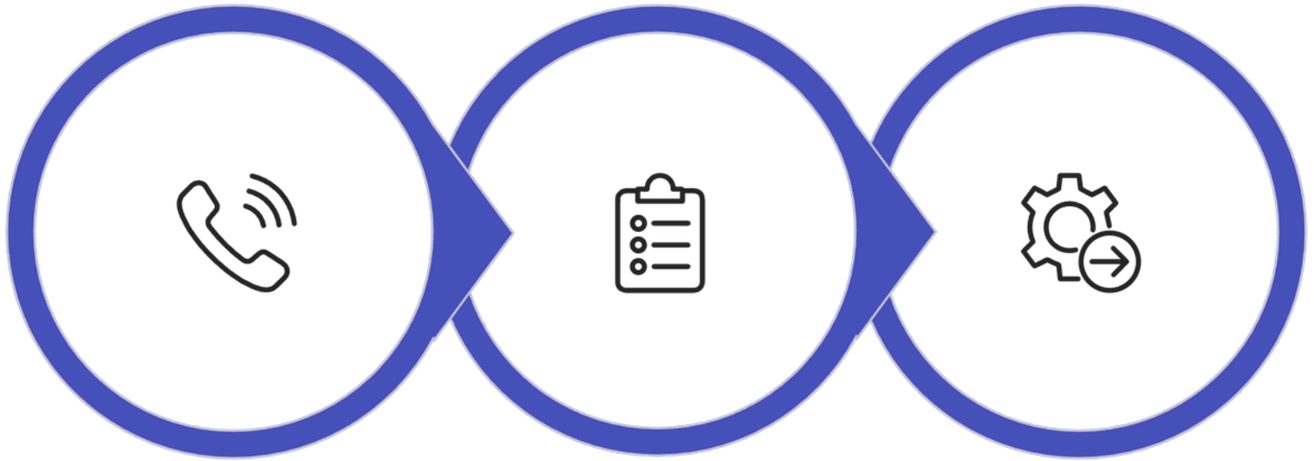
SAP/ERP workflows, planning systems, reporting visibility, and implementation support.

End-to-End Experience

Commercial supply, manufacturing, CDMO handoffs, and digital transformations.

HOW WE WORK

How a Pharma Supply Chain Engagement Works



Fit Call **Assessment** **Deliver**

We start by understanding how your planning, CDMO coordination, inventory, and systems actually work before recommending any change. Consulting and implementation are scoped separately.

SELECTED EXPERIENCE

Real Engagements. Measurable Outcomes.

S&OP Design for Commercial Pharma Manufacturer

Designed an integrated S&OP process connecting forecasts to manufacturing capacity and CDMO commitments across a multi-product portfolio.

CDMO Governance Framework

Built a CDMO onboarding and performance model to improve supply predictability and reduce escalations across an outsourced network.

Demand Planning for Mid-Size Biopharma

Improved launch-product demand forecasting across Commercial, Supply, Finance, and CDMO planning without adding new systems or headcount.

CLIENT IMPACT

What Clients Say

"Gyan Solutions brought a structured and practical approach to our work. They understood the importance of clear processes, defined accountability, and solutions that could operate effectively within a quality-focused pharmaceutical environment."

Adrien Kabamba · Director of Quality, Pharma PPI

"Gyan Solutions brought structure and visibility to a complex clinical-stage development program. They established a practical framework that improved ownership, coordination, and decision-making without disrupting our existing systems."

Executive Director, CMC · Clinical-Stage Biotechnology Company
